Important safety instructions

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience or knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

- Keep the iron and its cord out of reach of children less than 8 years of age at all times.

- The iron must not be left unattended while it is connected to the supply mains.

- The plug must be removed from the socket before being filled with water.

- The iron must be used and rested on a stable surface.

- When placing the iron on its heel, ensure that the surface on which the heel is placed is stable.

- The iron is not to be used if it has been dropped, if there are visible signs of damage or it is leaking.

- The filling aperture must not be opened during use.

Steam level setting (see step 3 of 'Using the iron for steam ironing' on page 4)

- No steam (see 'Dry ironing' on page 5)
- Low
- Medium / High
- High

Fabric
- Nylon, Acetates, synthetic fabrics
- Wool, Polyester mixtures
- Cotton, Linen Rayon, Rayon mixtures

Ironing
- Iron on wrong side, if moisture required, use damp cloth (not Acetate)
- Fabrics requiring this setting usually require steam pressing.

With water in tank
- Steam/spray/shot of steam
- Dry and spray

Without water in tank
- Dry ironing
- Dry ironing

Before use

Remove any protective cover from the soleplate (6).
Using the iron for steam ironing

Make sure the iron is not plugged in. Set the variable steam switch (4) to ‘ ’. Fill the water tank (10) via the filling hole (1).

**IN HARD WATER AREAS, WE RECOMMEND A MIX OF 50% TAP WATER AND 50% DISTILLED OR DEMINERALISED WATER.**

Never use battery topping up fluid or water containing any substances like starch, sugar, fragrant additives or defrosted water from a refrigerator.

Plug in the iron and switch on at the mains. Set the temperature dial (8) to the temperature required (see ‘Temperature Guide’ on page 3). Begin with cool fabrics and work up to higher settings. An iron heats up quicker than it cools down so you will save time and energy.

Your iron is fitted with a temperature indicator light (9) which will switch on and off whilst you are ironing. The temperature indicator light will illuminate until the required temperature is reached, then it will turn off.

Vary the steam output using the variable steam switch (4). Only use the steam facility on heavy fabrics (midway between 2 and 3-dot, to MAX).

For stubborn creases, use the water spray button (2). You may need to press this a few times to prime the pump.

Steam boost
Press (3) for an extra steam boost for stubborn creases / heavy fabrics.

NOTE: If you need to use the steam boost whilst dry ironing, check the temperature dial (8) is set within the steam range.

NOTE: For optimum steam quality, do not operate the shot more than three times in succession.
Dry ironing

Your iron can be used for dry ironing. Set the variable steam switch (4) to ‘ ’ and set the temperature dial (8) as desired (see page 3). You won’t need water in the tank unless using the water spray or steam boost features.

Vertical steam

Vertical steam is useful for removing creases from hanging clothes, curtains, etc. Hold the iron between 1cm and 2cm away from the item and press the steam boost button (3).

Features of your iron

Anti-drip system

This prevents water escaping from the soleplate (6) when the iron is too cold.

During use, the anti-drip system may emit a loud click, particularly during heat-up or whilst cooling down. This is perfectly normal and indicates that the system is functioning correctly.

Life long anti-scale system (certain models only)

This system reduces scale deposits and helps prolong the life of the iron.

Maintenance

Emptying and storing

To clean a stainless steel soleplate

We recommend using a generally available gentle chrome, silver or stainless steel cleaner. Always follow the manufacturer’s instructions.

To clean a coated soleplate

Do not use scouring powder or solution as this could cause damage to the coating.

To clean either soleplate type

If any man-made fibres fuse to the soleplate (6), set the iron at the 3-dot position for a stainless steel soleplate, or MAX position for a coated soleplate, and pass it over a clean piece of cotton to draw the deposit off the surface.

To clean the exterior

Allow the unit to cool and wipe over with a damp cloth and mild detergent, then wipe dry.

When you have finished ironing, unplug and empty all water from your iron and set the steam switch at the ‘ ’ position. When cool, store the iron on its heel with the cord wrapped loosely around the heel.

Self clean

Your iron has a built in cleaning system designed to keep the water valve, steam chamber and steam vents clear of lint and loose mineral deposits.

1. Half fill the iron with water.
2. Place the iron on its heel.
3. Move the variable steam switch (4) to the ‘‘position.
4. Connect to a mains supply outlet.
5. Set the temperature dial (8) to ‘MAX’. See step 2 of ‘Using your iron for steam ironing’ on page 4.
6. The temperature indicator light (9) will illuminate until the required temperature is reached, then it will turn off. Wait for one more cycle - the temperature indicator light illuminates and switches off.
7. Disconnect the iron from the mains supply outlet.
8. Whilst the iron is still very hot, hold the iron horizontally over a sink.
9. Press and hold down the self clean button (7).

WARNING: Steam and boiling hot water will drain from the holes in the soleplate. This washes away the scale and minerals that have built up inside the steam chamber.

10. Gently move the iron back and forth until the water tank is empty.
11. When cleaning is complete, release the self clean button (7).
12. Rest your steam iron back on its heel and allow to fully cool down.
13. Wipe the soleplate (6) with a cold, damp cloth.

WARNING: Keep hands and body away from the hot water.

WARNING: Do not attempt to descale the soleplate with descaling products.

Registering your 3 year guarantee

Your standard 1 year guarantee is extended for an additional 2 years when you register the product within 28 days of purchase with Morphy Richards. If you do not register the product with Morphy Richards within 28 days, your product is guaranteed for 1 year. To validate your 3 year guarantee register with us online at www.morphyrichards.co.uk

Or call our customer registration line
UK 0844 871 0962
IRE 1800 409 119

N.B. Each qualifying product needs to be registered with Morphy Richards individually.

Please note that the 3 year guarantee is only available in the UK and Ireland. Please refer to the 1 year guarantee for more information.

Exclusions

Morphy Richards shall not be liable to replace or repair the goods under the terms of the guarantee where:

1. The fault has been caused or is attributable to accidental use, misuse, negligent use or used contrary to the manufacturer’s recommendations or where the fault has been caused by power surges or damage caused in transit.
2. The appliance has been used on a voltage supply other than that stamped on the products.
3. Repairs have been attempted by persons other than our service staff (or authorised dealer).
4. The appliance has been used for hire purposes or non domestic use.
5. The appliance is second hand.
6. Morphy Richards reserves the right not to carry out any type of servicing under the guarantee at its discretion.
7. Plastic filters for all Morphy Richards kettles and coffee makers are not covered by the guarantee.
8. Batteries and damage from leakage are not covered by the guarantee.

* This guarantee does not confer any rights other than those expressly set out above and does not cover any claims for consequential loss or damage. This guarantee is offered as an additional benefit and does not affect your statutory rights as a consumer. Morphy Richards products are intended for household use only. See usage limitations within the location safety instructions.

Disclaimer

Morphy Richards has a policy of continuous improvement in product quality and design. The company, therefore reserves the right to change the specification of its models at any time.

For electrical products sold within the European Community. At the end of the electrical products useful life, it should not be disposed of with household waste.

Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice in your country.
