

Update on Campus Safety

The Campus Safety team are on the cusp of instructing the specialist consultancy WSP to undertake a review of the Security Service. This instruction should be issued in early May. The process will involve WSP undertaking an audit of the current service and all those that participate into its delivery i.e., Campus Services, Halls Life, Student Support Services etc.

This work should take 4-5 week to complete. It will then be followed by a further period, probably involving a defined working group to identify a projected scope of service that seeks to capture how we want any future service to operate. The extent to which the existing audit differs from the shape of the proposed future service provision will determine the journey we need to go through. The RH100 output will feed into the post audit review.
