Disclaimer

This document was published in September 2020 and was correct at that time. The department* reserves the right to modify any statement if necessary, make variations to the content or methods of delivery of courses of study, to discontinue courses, or merge or combine courses if such actions are reasonably considered to be necessary by the College. Every effort will be made to keep disruption to a minimum, and to give as much notice as possible.

* Please note, the term ‘department’ is used to refer to ‘departments’, ‘Centres and Schools’. Students on joint or combined degree programmes should check both departmental handbooks.
Welcome to the Department of Geography

This handbook covers key points about the department, and study advice for your degree in the department.

Degree Programmes covered:

BA Geography
BSc Geography
BA Human Geography
BSc Physical Geography
All single honours Geography degree programmes have been accredited by the Royal Geographical Society (with IBG). Accredited degree programmes contain a solid academic foundation in geographical knowledge and skills, and prepare graduates to address the needs of the world beyond higher education. The accreditation criteria require evidence that graduates from accredited programmes meet defined sets of learning outcomes, including subject knowledge, technical ability and transferable skills.

1 Introduction to your department

1.1 Welcome

Welcome to Royal Holloway. Royal Holloway, University of London (hereafter ‘the College’) is one of the UK’s leading research-intensive universities, with six academic schools spanning the arts and humanities, social sciences and sciences.

Welcome to the Department of Geography at Royal Holloway. Geography is an important and dynamic discipline, which stretches from the concerns of the humanities and social sciences to the scientific study of the natural world. Recent developments, such as growing interest in climate change, geopolitics, social inequality and the growing interconnections of people and places across the globe mean that the importance of a geographical education has never been greater. The Department provides an excellent teaching and learning environment for geographers keen to develop their knowledge and skills in these, and other, key areas of the discipline.

We hope that you find Royal Holloway an exciting, stimulating and friendly place to study Geography. We place great emphasis on the importance of the culture and social life of the Department. In part, because of the importance of fieldwork, the Geography Department is probably more closely-knit than other academic departments, and you are likely to get to know both staff and other students very well. Remember that this is a two-way process – a happy and successful Department depends on the active involvement of students and staff alike. To this end, there are some key ‘basics’ which we expect all students to follow:

1. Attend all timetabled classes and tutor meetings. By this, we mean more than ‘turning up’. To get the most out of your studies here, you need to turn up having prepared by doing the relevant reading or background work. We aim for you to be active learners rather than passive receivers of information, so preparation is vital. This is particularly important this year when the need for flexible education in the light of the Covid-19 pandemic means that we have had to adapt our in-person teaching and deliver some classes online. For on campus classes you should make every effort to arrive before the start of the lecture and to take your seat before the start time. Late arrival at lectures impacts the learning environment and affects all those participating in it. Students arriving after the start of the lecture should enter only if they can do so without disrupting the lecture. Students must make every effort to enter the lecture theatre as discretely as possible to minimize disruption.

2. Meet all submission deadlines: whether summative or formative, deadlines need to be met. By doing this, we can get you feedback in time for you to improve your work before the next deadlines. All deadlines have been published on student noticeboards and on the Geography Undergraduate Moodle page, so you will know when they are for the whole of the academic year.

3. Respect all staff and fellow students. Our approach to teaching relies on you being motivated. If you are set a presentation topic, it is meant not just to benefit you, but your co-students as well. Your tutor will have designed a session in the expectation that you will make your contribution to the learning process. This means focusing on what is being said, and not being distracted by your phones or using laptops for any purpose other than the learning process.

1.2 How to find us: the Department

The Geography department is mainly located in the Queen’s Building (QB), additional staff and teaching space is located in the Munro Fox laboratory, EMU (postgraduate centre) and the geochronology laboratories (section 1.6). Staff offices can be found in the Queen’s Building (section 1.3 for maps and individual staff offices).
1.3 Map of the Egham campus

Please note, student parking is very limited and is not available if you live in Halls or within 1.5 miles of campus. If you do live more than 1.5 miles away or have a particular reason why you need to come to campus by car, you must apply for a parking permit. If you have a motorbike or scooter you must also register the vehicle with College. Find more information about the Parking Permit portal here.
1.4 How to find us: the staff

Head of School: Professor Tamar Pincus  
Code (01784) 44 3523  Wolfson 114  
P.t.pincus@rhul.ac.uk

Head of Department: Professor Phil Crang  
Code (01784) 44 3645  QB161  
p.crang@rhul.ac.uk

Academic Staff:

Professor Peter Adey  
44 3640  peter.adey@rhul.ac.uk  
QB123

Professor Simon Armitage  
27 6124  simon.armitage@rhul.ac.uk  
QB174A

Professor Simon Blockley  
44 3405  simon.blockley@rhul.ac.uk  
QB155

Professor Katherine Brickell  
27 6259  katherine.brickell@rhul.ac.uk  
QB158

Professor Ian Candy  
44 3649  ian.candy@rhul.ac.uk  
QB157

Dr Daniele Colombaroli  
44 3647  Daniele.Colombaroli@rhul.ac.uk  
QB156

Dr Bethan Davies  
414682  bethan.davies@rhul.ac.uk  
QB148

Professor Veronica della Dora  
44 3642  veronica.delladora@rhul.ac.uk  
QB178

Dr Vandana Desai  
44 3650  v.desai@rhul.ac.uk  
QB152D

Professor Klaus Dodds  
44 3580  k.dodds@rhul.ac.uk  
QB122

Dr Mike Dolton  
44 3575  m.dolton@rhul.ac.uk  
QB152A

Professor Felix Driver  
44 3572  f.driver@rhul.ac.uk  
QB151A

Dr Gwilym Eades  
44 3657  Gwilym.Eades@rhul.ac.uk  
QB145B

Dr Sasha Engelmann  
44 3567  Sasha.Engelmann@rhul.ac.uk  
QB152C

Dr Peter French  
44 3571  p.french@rhul.ac.uk  
QB181

Professor David Gilbert  
44 3653  d.gilbert@rhul.ac.uk  
QB154

Professor Harriet Hawkins  
41 4673  harriet.hawkins@rhul.ac.uk  
QB159

Dr Anna Jackman  
27 6043  Anna.Jackman@rhul.ac.uk

1.5 How to find the School office

The school office is located in the Wolfson Building, Room 118 on the ground floor. The Wolfson building is opposite the Queen’s Building.

1.6 The Department: practical information

The Department occupies modern purpose-built accommodation on the ground floor of the Queen’s Building. Here you will find a lecture theatre, teaching rooms, Geography staff offices, ‘Library@Geography’, and research and teaching laboratories. Additional teaching laboratories are located in the nearby Munro Fox Laboratories. The map below details the location of Geography department buildings, with a further diagram giving details of the location of staff offices within the Queen’s Building.

![Map of Geography Department buildings](image)
1.7 Staff research interests

Professor Peter Adey, BA Aberystwyth, MA Aberystwyth, PhD Aberystwyth  
Borders and mobility; Space; Political Geography

Dr Simon Armitage, BA Oxford, PhD Wales  
North African climate; OSL; late Quaternary evolution of SE African coast

Professor Simon Blockley, BSc Bradford, PhD Bradford  
Palaeoenvironment & abrupt climate change; Paleolithic archaeology; geochronology

Professor Katherine Brickell, BA London, MSc Sussex, PhD London  
Gender, violence and injustice; home and domestic life; South-east Asia

Professor Ian Candy, BSc London, MRes Reading, PhD Reading  
Quaternary geomorphology & sedimentology; uranium series geochronology; palaeoclimatic reconstruction

Dr Daniele Colombaroli, BSc, MSc Milan, PhD Bern  
Impact of disturbance on ecosystem structure and function; environmental proxies

Professor Phil Crang, BA Cambridge, PhD Cambridge  
Cultural Globilisation; geographies of consumption; geographies of work

Dr Bethan Davies, BA Nottingham, MSc London, PhD Durham  
Glacial geology & glaciology in Britain; Patagonia & Antarctica;

Professor Veronica della Dora, BA Ca’Foscari, Venice, PhD UCLA  
Cultural and historical geography; history of cartography; landscape studies; sacred space

Dr Vandana Desai, BA Bombay, BSL Poona, MPA Liverpool, DPhil Oxford  
NGO’s & civil society; gender; ageing; water; community participation; slums; India & sub-Saharan Africa

Professor Klaus Dodds, BSc Bristol, PhD Bristol  
Geopolitics and security; Antarctica and Arctic; geopolitics of contemporary cinema

Dr Mike Dolton, BA OU, MA Sussex, PhD London  
Democratisation through local participatory networks; UK urban policy & regeneration

Professor Felix Driver, MA Cambridge, PhD Cambridge  
Exploration & empire; museums; exhibitions & collections; popular geographical publishing; history of geographical film

Dr Gwilym Eades, BSc Victoria, MA Ottowa, PhD Montréal  
Critical GIS; Memetics of place; Indigenous toponymy; Geoweb

Dr Sasha Engelmann, BA Stanford, MPhil Oxford  
Geographies of Art; Art-Science collaboration

Dr Peter French, BSc Kingston, PhD Reading  
Coastal & estuarine management; public attitude to coastal risk

Professor David Gilbert, BA Cambridge, DPhil Oxford  
Geographies of 20th century London; imperialism; tourism and the modern city

Professor Harriet Hawkins, BA Nottingham, PhD Nottingham  
Geographies of contemporary art, histories of creative geographies, art/science collaboration

Dr Anna Jackman, BA Exeter, MRes Exeter, PhD, Exeter  
Geographies of contemporary warfare

Dr Innes Keighren, BSc Edinburgh, MSc. Edinburgh, PhD. Edinburgh  
Cultural and historical geography; historical geographies of science; history and geography of the book; history of travel and exploration

Dr Ian Matthews BSc London, PhD London  
Geochronology; Environmental Archaeology; palaeoecology

Dr Alice Milner BSc Leeds, PhD Leeds  
Mediterranean biogeography, peatland ecosystems, climate change

Professor Jay Mistry, BSc London, PhD London  
Fire management in the tropics; Savanna management; Tropical ecology

Dr Oli Mould, BA Leicester, MSc Leicester, PhD Leicester  
Urban studies; Creative industries; Urban subcultures

Dr Adrian Palmer, BSc, MSc, PhD London  
Quaternary sedimentology; varve chronology; landscape response to rapid climate change
Dr Laurie Parsons, BA Durham, MA Phnom Pehn, PhD London
*Climate change and inequality; Modern slavery, Cambodia*

Dr Alasdair Pinkerton, MA St Andrews, MA London, PhD London
*Critical geopolitics; communications research; central & South Asia*

Professor Danielle Schreve, BSc London, PhD London
*Quaternary mammals; palaeoenvironments; palaeolithic archaeology*

Dr Jenni Sherriff, BSc Birmingham, MSc London, PhD London
*Quaternary sedimentology, Geochemistry, Palaeoecology*

Professor David Simon, BA Cape Town, BA Reading, DPhil Oxford
*Development-environment theory, policy & practice; sustainability; urbanisation; cities and climate change;*

Dr Rachael Squire, BA London, MA London, PhD London
*Geopolitics of oceans and seas*

Mr. Don Thompson, BSc London
*River and hill slope processes; water supply in the developing world*

Dr Varyl Thornycraft, BSc Sheffield, MSc Liverpool, PhD Exeter
*Late Quaternary palaeohydrology; floods & climate change; GIS and digital terrains*

Professor Katie Willis BA Oxford, MPhil Oxford, DPhil Oxford
*Gender; households; migration & development; child refugees*

2 Support and advice

2.1 Support within your School

The School Helpdesk is there to help you with any questions or concerns you might have about your studies. Opening hours are 8:30am to 5:30pm in term time and 10:00am to 4:00pm during vacation. The Helpdesk is staffed throughout these opening hours. It is situated in the Wolfson building, room 118, but owing to Covid-19, it will not be operating a walk-up service.

Depending on your query, the Helpdesk will answer your question immediately, put you in touch with a colleague who can help, or find out the answer and get back to you. If you wish, you may also talk to them in a private online meeting and they will receive the support you require.

These are ways currently available to contact the School Helpdesk:

- Email [LSE-school@royalholloway.ac.uk](mailto:LSE-school@royalholloway.ac.uk). Emails are monitored during working hours (Monday to Friday 9am to 5pm) and we aim to respond within 48 hours.
- MS Teams drop-in sessions, accessible here ([Join Microsoft Teams Meeting](https://teams.microsoft.com/l/meeting?lзамените_c=287bfe&smid=4157f6e0-0e9c-42c4-b560-5d7561f32e9b&scope=calendar&step=0.0)). These take place Monday, Wednesday and Friday from 12 noon - 1pm. *Please note, these are public meetings.*
- If you would like a private MS Team appointment with a member of the admin team, [click here](mailto:). 
- If you need to speak to someone more urgently, please call 01784 276884 (Monday to Friday 9am to 5pm).

If you have a problem or concern, approaching the right person in the first instance will allow the problem to be dealt with quickly and efficiently. For many issues, your personal tutor is the first point of contact, but for others, you should see the following:

- With a topic in an individual module: see the lecturer concerned
- With the administration or examination of an individual module: see the Module Convenor
- With examination arrangements more generally: see the Exams Officers, Dr Peter French, Dr Gwilym Eades or Mr Don Thompson
- With module selection: see the Undergraduate Education Lead, Professor Katie Willis
• With general academic organisation: see the Undergraduate Education Lead, Professor Katie Willis
• With personal difficulties: see your Personal Tutor, Dr Mike Dolton (Wellbeing Lead) or the Counselling Service
• With general non-academic queries or fees: go to the Student Services Centre in the Emily Wilding Davison building
• With a problem worrying many students: ask your year rep to raise it at the Student-Staff Committee or, for urgent issues, See Professor Katie Willis
• With English as a second language: contact your Personal Tutor or the Centre for Development of Academic Skills (CeDAS)
• With writing skills in general: Contact CeDAS
• With issues relating to specific learning difficulties: see Dr Mike Dolton (Senior Tutor) or the Disability and Dyslexia Services Liaison officer

2.2 Equality, Diversity and Inclusion

The Department is committed to being an inclusive and supportive environment for all students and staff, respecting each other and our diverse perspectives and experiences. Dr Vandana Desai is the Department’s Equality and Diversity Lead, and there is student representation on the Department’s Equality and Diversity Committee.

Any student who has concerns about equality, diversity and inclusion issues in general, or relating to a specific incident, is encouraged to contact Dr Desai, or the Student representative on the E&D Committee. Students can also contact the Head of Department.

2.3 Student-Staff Committee

The Department runs an undergraduate Student-Staff Committee which meets three times a year (once a term) and plays an important role in the Department as a forum for airing student views and discussing changes to teaching and learning provision.

Elections for the committee are held at the beginning of each academic year and are run by the Students’ Union. The Department encourages all students to consider standing for election.

A full list of student representatives is posted on the student noticeboard and on the Geography Undergraduate Moodle page. All students can submit items for discussion at Student-Staff Committee meetings through the representatives. Minutes of the meeting are also available to all students both online and on the student noticeboard.

2.4 The Geographical Society (GeogSoc)

The Geographical Society is run by students. It provides a programme of both academic and social events across all three terms. Elections for the GeogSoc Committee take place towards the end of each academic year, with a further election in October to choose a first-year representative. All events are publicised on the GeogSoc noticeboard and the GeogSoc Facebook page.
3 Communication

3.1 Post
All post addressed to you at the Geography department is kept in the Undergraduate pigeonhole in the post room (Queen’s 163) situated in the Queen’s Building. At the end of each term this is cleared of accumulated mail which is then destroyed. Important information from Academic Services is often sent by internal post and you are advised to check them regularly.

3.2 Notice boards
The official student notice boards are on the walls in foyer of the Queen’s Building. Every effort is made to post notices relating to class times, etc., well in advance, but occasionally changes have to be made at short notice and in that case e-mail will be used. In the case of last minute cancelling due, for example, to staff illness, notices will be posted on the door of the relevant lecture room.

All general course notices and general student notices will be displayed on the year notice boards outside the main Queen’s lecture theatre. General timetable and course detail information are posted on the boards outside QB171.

3.3 Geography Undergraduate Moodle Page
All Geography undergraduates have access to the Geography Undergraduates Moodle page. This contains details of assessment deadlines and other general departmental information.

It is your responsibility to make sure you are informed of the times and places of all classes, meetings and of any requirements (e.g. essay deadlines) relating to your courses; so, if in doubt, please ask.

3.4 Personal Tutors
Your personal tutor is your first point of contact in the Department if you have any concerns or problems. You will normally remain with the same tutor for the duration of your studies, although at times staff are awarded a period of sabbatical research leave, in which case, another member of staff will act as temporary personal tutor for the duration of leave (normally one term). A list of Personal Tutors and their tutees is prepared before the beginning of the academic year and displayed on Year Notice boards and the Geography Undergraduate Moodle Page

First-Year Students
Your Personal Tutor will be introduced to you during the first week at Royal Holloway. They have particular responsibility for your welfare and academic development during your degree course. You will have an initial meeting with your Personal Tutor during your first week in the Department to help you settle into life at RHUL. Thereafter you and his or her other personal tutees (usually a group of 7-8 students) meet frequently during the first term. In the first few weeks tutorials will concentrate on what we call ‘study skills’ – teaching you the basics of university life and ways of studying effectively. These sessions will follow up on material covered in the first-year ‘techniques’ lecture course. For the rest of the first term, and the second, you will have tutorials to support the lecture courses GG1001 and GG1003 in term 1, and GG1002 and GG1004 in term 2. Some of these will be held by your Personal Tutor, depending on their subject area, whilst others will be held with another member of staff.

You will also see your Personal Tutor at the start and end of each term, to discuss details of academic progress and preparation for examinations. A short report of this meeting will be entered on your Departmental record. At the end of May, your Personal Tutor will discuss your choice of courses for next year (preliminary registration), and they will discuss your overall performance and progress at the end of the academic year.

Your Personal Tutor will also be involved in monitoring and reviewing your personal and employability skills and also to help you think about how these can be developed through your
course choices. You are strongly encouraged to keep a written record of your courses, activities and acquired skills during your degree course, to help you write a CV and focus on your career choices. This is part of the career planning framework at RHUL around Evaluate; Explore; Enact. You can go onto the Careers Service website for more information.

**Second Year Students**

In the second year you will meet with your personal tutor at the beginning of the year to discuss course registrations and receive feedback on first-year exams. Thereafter you will see your Personal Tutor at the start and end of each term to discuss academic progress, careers, and preparation for examinations. A short report of each meeting will be entered on your Departmental record. In January, you will meet with your personal tutor at the start of the dissertation process. At the end of May, your Personal Tutor will discuss your course choices for your third year (preliminary registration), and, at the end of the year, they will discuss your overall performance and progress. You are encouraged to participate in career-oriented activities run in the Department, and to use the services and facilities of the Careers Service and other opportunities for skills development on campus (e.g. through the Computer Centre or Language Centre).

**Third Year Students**

At the beginning of the third year you see your Personal Tutor to discuss course registrations and receive feedback from second year exams. Thereafter you will see your Personal Tutor at the start and end of each term, to discuss details of academic progress, career possibilities, activities outside of the Department and preparation for examinations. A short report of these meetings will be entered on your Departmental record. Your Personal Tutor is usually the best person to write you an academic reference, and you should keep them informed as your career develops.

**Reminder:** It is a Departmental requirement that you see your Personal Tutor at the beginning and end of each term. Failure to attend these meetings may lead to formal warnings being issued to you. You should also keep your Tutor informed of any issues which may affect your progress during the year.

If for any reason you wish to change your Personal Tutor, you should consult Professor Katie Willis as Undergraduate Education Lead who will treat the matter in confidence should you wish.

**3.5 Questionnaires**

We take student feedback very seriously, and welcome your comments on the Department and all taught courses. In order to obtain your feedback on taught courses, you are asked to complete an anonymous questionnaire at the end of each course. The feedback you give us helps in making changes to courses and to increase the effectiveness of our teaching and teaching resources.

All questionnaires are seen by the Head of Department, the Undergraduate Education Lead and Director of Teaching, and are analysed as part of the College’s Annual Monitoring process. Constructive criticism is always welcomed and plays an important role in course development. (Deserved praise is also very welcome and can make a tremendous contribution to the job satisfaction of your lecturers!)

You can also make comments throughout the year about the quality of your courses and degree programme through the Student-Staff Committee.

**3.6 Space**

The Department has its own study space supported by the library: ‘Library@Geography’ (QB174) containing work space and maps. Library@Geography offers a quiet place for students to work – consumption of food, drink and the use of mobile phones is not permitted. For academic year 2020-21, because of the hygiene requirements due to Covid-19, we are not allowing students to use Library@Geography for independent study. This decision will be reviewed for Term 2. Library@Geography will be used for small group teaching instead.
4  Teaching

Because of the diversity of the degree programme at Royal Holloway, and the nature of our discipline, you will find that you are taught in a variety of ways, including lectures, tutorials, seminars, practical classes and field classes. We would emphasise that success at degree level is also about the work that you do outside of the formal teaching programme. For all courses you must spend a substantial amount of time reading, and in preparation and writing of assignments. In this respect the learning environment at a university is unlike that at school. As a rough “rule of thumb” we recommend that you spend at least the equivalent of a 35 hour working week on your studies. In a normal week you will usually have between 8 and 12 hours of formal teaching (contact hours) either in person on campus, or online. This means that you should be spending about 25 hours a week working independently.

University-style working is not something that comes easily to everyone - it is, for example, very different from school or working for a company. In the first few weeks in the Department, the Geographical Techniques course (GG1011), with additional support from your Personal Tutor, will take you carefully through the basics of what we call ‘study skills’.

4.1 Study weeks

The Geography Department does not have study weeks, however visiting students, European Studies students, or those taking electives in Geography, may find that other departments do have reading weeks. Such students should still attend all Geography lectures and seminars during any study weeks in other Departments.

Key Dates which may affect you:
First-Year
• Spain Fieldtrip: Leaves on Sunday 24\textsuperscript{th} and returns Sunday 31\textsuperscript{st} January 2021

Second Year
• Fieldtrips take place in the week of 22\textsuperscript{nd} March 2021. The exact dates for each trip will be confirmed to students at the start of the academic year. The Malawi trip may run into the first week of the Easter vacation.

4.2 Types of Teaching

There is a range of different teaching styles used by the Department. Each requires you to develop different learning approaches and skills, and adopt different forms of preparation. Teaching methods used will vary from module to module depending on the nature of the material being taught and the views of the lecturer on how best to teach it. Thus, some modules will have a heavy focus on lectures, some may have a greater reliance on small group work or class discussion based on directed reading, whilst others may involve a high proportion of laboratory, field or group work. Lecturers are always willing to help and advice on particular problems associated with their module – see them during their office hours or at other times by arrangement.

Lectures

The most common form of teaching in the Department is the lecture. For 2020-21 many of the modules will have lectures given online, rather than in person. The lecture is a good way of introducing you to a theme or topic, and of giving you an overview of the most significant themes and arguments. Lectures are not the best means of conveying large amounts of detail or factual material - most lectures are accompanied by handouts and suggested reading, and use the ‘Moodle’ system for giving additional information. It is, therefore, important that you treat lectures as the starting places for your study, not as the whole course. Such an approach in exams and essays will, inevitably, lead to poorer marks than if you fully engage in the topic with additional study and reading. The marking criteria in Appendix A detail the level of engagement needed to achieve higher marks in assessments. It can be difficult for lecturers to know whether a group of students has understood particular points - we encourage you to ask questions either during the lectures, at the end, or during a lecturer’s dedicated office hours.
Tutorials
These are commonly used in Year 1 and typically consist of a lecturer or teaching assistant working with a small group of students. The emphasis here is very much that you should treat learning Geography like learning a language - you need to speak ‘Geography’ yourself as well as listen to it being spoken. A tutorial where the lecturer does all the talking isn't really working. Try to make sure that you make a contribution to the discussion (making sure you’ve done the preparatory work really helps!)

In the First-Year you spend the first few weeks of the first term working with your Personal Tutor, developing study skills. For the remainder of the first term, and the second, both your Personal Tutor and another named member of staff (Academic Tutor) will work on aspects of the courses that you are currently studying. In this way you get to know at least two members of staff well in the first-year. If your Personal Tutor has expertise in an aspect of human geography your Academic Tutor will be a physical geographer, and vice-versa. In each term you'll be set two assignments to support each two of the modules that run in that term (GG1001 and GG1003 in term 1; GG1002 and GG1004 in term 2). Completion of these assignments is a requirement of the modules. For each module you will have a formative assessment (to help you develop your understanding and skills) and a summative assessment (which will contribute to your module mark).

Seminars
These are interactive sessions where the focus is on students contributing to discussions and/or presenting their work. For 2020-21 they are a very important aspect of our teaching, particularly our in-person, on-campus teaching. It is vital that you complete the preparatory work in advance of the seminar. This preparatory work may include activities such as a reading task, watching online lecture material, completing exercises on Moodle, or doing a small piece of research.

Practicals
Geographical Techniques GG1011 and GG1015 in the first-year, GG2001, GG2013, GG2021, GG2041, GG2043 in the second year, and other individual courses in year three, will involve a series of practical exercises, either in the field, in the laboratories, or in the computer suites. In most practical classes the lecturer is supported by demonstrators, who are on hand to help you with the work and to discuss issues arising from it.
For all practical work it is vital that you follow the Health and Safety guidelines set out later in this Handbook, and all additional safety instructions given by the course leaders.

Fieldwork
You’ll find that fieldwork is a very important aspect of the degree programme at Royal Holloway. We feel that it is something that makes Geography a very distinctive undergraduate experience, and as such, it forms an important element of the compulsory research training strand of the degree programme. We believe that fieldwork provides you with a unique opportunity to learn new techniques and to apply those methods already learned. Fieldwork is also important in getting you to identify a problem or research question, and to develop approaches designed to solve or answer it. We see our fieldwork programme as vital training for your independent research work (Dissertation). We hope that fieldwork also opens your eyes to the wider world, developing your sense of place, awareness of difference, and tolerance for others. We have also found that many regard fieldwork as both one of the most enjoyable aspects of their degrees, and as a time when they acquired important skills and sensitivities which have been important to them in later life.

In the second term of the first-year, a week-long field course takes place in southern Spain (GG1032), where work in physical, environmental and human geography is undertaken. This is assessed on return to College by a formal field report and an individual poster. In the second year students choose from a series of destinations related to different interests and specialisms
These courses run at the end of the second term, and run for between a week and ten days. Whichever trip you choose, it is assessed by a written report.

Because of Covid-19, we may have to make changes to our fieldwork programme. We will keep students informed of the situation.

**Fieldtrip Costs**

The cost of attending the first-year Spanish fieldtrip will be met by the Department. Second year trips will be funded by individual students, although financial assistance may be available from College in special circumstances. The cost of attending the different second year fieldtrips varies from year to year depending on exchange rates, transportation costs, inflation etc. You will be advised of the cost at the start of the academic year and given a deadline for the payment of a non-returnable deposit and another for the balance. The two London-based trips are free to students. Failure to meet payment deadlines without prior approval from the fieldtrip leader may result in the cancellation of your transport, accommodation and other arrangements. If you do not attend a fieldtrip, unless you have extenuating circumstances acceptable to the Department, you will be unable to complete the work for the associated coursework. In consequence, you will receive a mark of zero for the course. If you have genuine difficulties in paying the deposit, please advise the Department as soon as possible. Help may be available from the [The Student Finance and Funding Advisers](#) based in Support & Advisory Services.

**Fieldwork safety (see also later Health & Safety section)**

Safety on fieldwork is of paramount importance. Before every field trip that you participate in, you must sign to acknowledge the appropriate risk assessment and associated health and safety information. You should also be familiar with the ‘Fitness for Field Studies’ document. This also applies to the independent dissertation (GG3001/GG3005). These will be issued to you by the member of staff responsible for the field class. You must also make sure that your health form is updated to include any medical conditions, problems that may be relevant in the field.

**Use of Moodle**

All class sessions are supported by virtual learning tools, in particular Royal Holloway’s ‘Moodle’ platform. All courses have designated Moodle sites that are made accessible to the students registered on that course. Individual courses use Moodle in varying ways as most appropriate to the broader course learning ethos and curriculum. However, all courses use Moodle to support your learning in at least five ways:

- The **digital provision of core information** for courses such as handbooks, reading lists, session timetables, coursework guidance, links to past exam papers, and so on;
- The provision of information, materials and resources to be used by students in **preparation** for class sessions, including the uploading of lecture powerpoints ahead of class sessions;
- The **archiving** of materials from class sessions, such as powerpoint slides, class handouts, etc.;
- The supporting of students’ **independent research after class** sessions, through guided reading, other activities, links to good quality media on relevant issues, etc.
- **Communication** with students via the Course Forum tools.

Some courses and lecturers use other online learning tools, as appropriate to their materials and activities. In such cases, the lecturer will introduce the tools, explain how and why they are being used, and support your engagement with them.

**Independent Reading & Research**

University study is not about learning a set package of facts that have been dictated to you in a lecture, and regurgitated in an exam. It should be a process for which you take responsibility. Success in your studies is ultimately dependent on independent reading and research. You cannot
expect to do well in your degree without supplementing the formal teaching (lectures, tutorials etc.) by reading the recommended materials. By not undertaking extensive reading, and fully engaging in the topics you are studying, you are unlikely to gain more than a basic degree, and unlikely to do yourself justice in course assessment and examinations. This ultimately affects the final degree you obtain, and your future career prospects.

It is up to you to do this additional work to flesh out the basic material you will be given in lectures. Formal teaching occupies about 10 – 12 hours per week, which represents between a quarter to a third of a working week (we assume you will be working between 35 and 40 hours a week). You will also need to work for module assessments, but there will still be a considerable amount of time available for private study. During this time you should plan to cover the basic reading for all your modules, follow up ideas or issues which interest you in more depth (your lecturers can advise on further reading if you need help), read more widely than just material which covers your own modules (if you find a book or scientific paper of interest that is not on a reading list, there is no reason why you shouldn’t read it anyway), and plan and write essays and coursework. Ultimately, though, it is important to think about what you have been reading, do not just try to cover masses of ground without checking whether you are taking it in and understanding it and how it applies to your modules. Importantly, make sure you understand what you read. In addition, one of the skills to develop is to read widely and to take in the material which you are learning. Inevitably, you will read material which presents differing viewpoints, and may even present a different message. In such cases, you need to consider which you favour by thinking carefully and critically about the arguments presented. If you are unsure, discuss the issue with your lecturer.

You are unlikely ever again to have such flexibility and time available to plan your own work schedule, and to pursue your own interests as you have over the three years of a degree, and we hope you will make the most of this opportunity. This also raises the issue of time management, which is covered below. The degree you put together is yours; it may sound clichéd to say that you get out what you put in, but it is very true in this case. Our job in that context is to help you do it. To help you achieve this, you’ll be given practical training in searching for information in the library, via the Web and other bibliographic software. If you need to refresh these skills in the second or third year, or you need further advice on searching for information (perhaps to support your dissertation) contact Debbie Phillips, the Information Consultant for Geography based in the Library or the Centre for the Development of Academic Skills (CeDAS) who can provide support in effective writing, statistics or presentation.

**Time Management**

One key skill that you should learn early in your career is time management, and how to plan your work load effectively to enable you to attend your modules fully prepared; to allow you to complete adequate follow-up reading; and to allow you to prepare for effective production of assessments. This can be difficult to develop as one of the overriding principles is to identify the times to work and to make sure that at these times, you work effectively.

A basic starting point is to identify when your formal teaching sessions are, and to find out what is involved in each. You will usually be expected to complete preparatory work in advance of in person on online sessions, so you need to ensure that you have scheduled time for this.

The deadlines for all your coursework are available at the start of the academic year on the student noticeboards and on Moodle. We do not have more than one deadline on any one day, but most deadlines fall in the last 2-3 weeks of term as you need to have completed work and had time to do the assessment. Make sure that you plan your work carefully to avoid stress as the deadlines approach.

Don’t be daunted, set yourself targets for each study session, e.g. to read a number of pages, complete a number of exercises, draft an essay etc. Make sure you have enough slots to cover all of your courses; you may find it easier to put the most difficult module first, do some basic work for this and come back to it later.
Meetings
You are likely to be ‘invited’ to meet with a member of academic staff in the department if you fail to attend all learning activities in two consecutive weeks without providing an explanation, or where your pattern of absence is:

- considered to be having an effect your work or causing concern for your well being
- pointing to a possible disability/problem that you may not have disclosed
- where your attendance is approaching the minimum attendance level

You should take any meeting ‘invitation’ seriously. If you should have problems you are being offered an opportunity to seek advice and assistance. At the meeting the Department’s expectation of you will be made clear and the formal disciplinary process will be outlined to you.

Conduct during teaching sessions
Teaching sessions include all lectures, seminars, tutorials, practicals and fieldwork both in person and online. As such, these sessions should be carried out in such a manner as to encourage learning and study. To enable this to happen, the following should be observed:

- Eating and drinking (except water) in class is not permitted by the College, in compliance with current Health and Safety legislation. Not even water may be drunk in laboratories.
- Students must not engage in conversation with one another during a lecture or class unless it is part of an organised class activity.
- When wishing to ask a question or contribute a comment students should draw the lecturer’s attention by putting their hand up.
- Mobile phones and other electronic devices must be switched off at the beginning of the lecture unless these devices are directly related to the lecture; for instance, laptops for note-taking or authorised recording devices for students registered with the Dyslexia and Disability Services and will not cause disruption to the class.
- Personal electronic recording of lectures is discouraged and should only be requested for good reason (e.g. specific learning difficulty). Permission to record classes should be sought in advance from the lecturer in charge. Some sessions will be recorded by the lecturer and then made available on Moodle.
- Students are welcome to use laptops in class for the purpose of note-taking. Web browsing should only be done as part of an organised class activity. Gaming and social networking in class is prohibited.

Abuse of these rules, particularly in respect of the use of phones/laptops/tablets, could lead to them being banned from the room.

Students are expected to treat the learning environment with respect and to adhere to the points detailed above. Lecturing staff will remind individuals of their responsibilities to others as class members when breaches to this code of conduct are identified. In exceptional circumstances, persistent individuals may be asked to leave. Where students are concerned about the behaviour of others, in that it is disturbing their ability to concentrate, and this is not noticed by the lecturer, this should be brought to the attention of the lecturer in charge during a break or at the end of a class. Lecturing staff will be proactive in reminding individuals to be respectful of the needs of other members of the class.

If lecturing staff themselves fail to adhere to these principles, or if students have other concerns relating to staff teaching or conduct, students can contact the Undergraduate Education Lead, Professor Katie Willis, with details of the incident. She will raise the matter with the lecturer in charge or Head of Department as appropriate.
5 Degree structure

Full details about your programme of study, including, amongst others, the aims, learning outcomes to be achieved on completion, modules which make up the course and any course-specific regulations are set out in the course specification available through the Course Specification Repository.

5.1 Department specific information about degree structure

We offer Geography as a Single Honours Geography degree (BA or BSc); BA Human Geography and BSc Physical Geography.

Our degree courses aim to:

- Give a sound and extensive basis for the study of Geography, meeting the requirements of the national subject benchmarking statement in the development of knowledge, understanding, and intellectual, discipline-specific and key skills.
- Provide a flexible and progressive structure in which students are able to gain knowledge, understanding and appropriate skills relating to distinctive research specialisms.
- Produce graduates with a range of personal attributes relevant to the world beyond Higher Education, who are able to engage in lifelong learning, to consider ethics and values, and to contribute to the wider community.

All undergraduates are registered for one programme and should follow the requirements for this.

First-Year: There are four main modules which are designed to give a firm grounding in major aspects of the discipline, two of which are taught in each term. During the first term you will take GG1001 Physical Geography I: Atmosphere, Oceans & Geosphere and GG1003 Human Geography I: Cultures, Economies, History. In the second term you take GG1002 Physical Geography II: Biogeography, Ecology & Scales of Change, and GG1004 Human Geography II: Politics, Society, Development & Environment. These courses are supported by work you do in your tutorial groups. You also take a broad-ranging core course in Geographical Techniques (GG1011), which provides training in methods and skills used in geographical analysis, such as field methods, statistical analysis, and physical, cultural and social research methods. Students also take an introductory course in GIS and remote sensing (GG1015), and also attend a field course in January in southern Spain (GG1032).

Second Year: In the second year you have a great deal of flexibility to take different combinations of courses to reflect your interests. All Geography students have to take 2 x 15 credit core courses; GG2001 Geographical Techniques II, and GG2003 Geographical Field Training which requires students to attend a field course to be held in late March. GG2001 also provides preparation for the third year dissertation. You must then take three of the other 30 credit courses on offer in the degree programme (or two plus 30 credits of study outside the Department - see the note on electives below). The second year courses are integrated courses on substantial parts of the discipline. They take you beyond the introductions provided in the first-year and provide a basis for the specialist options in the third year.

Third Year: The third year of the programme is also extremely flexible. All Geography students have to take either GG3001 or GG3005. This is a substantial independent dissertation on a research topic of your choice. In many ways this is seen as the culmination of what you have learnt about research design, research techniques, analysis, and the presentation of your work. You must then take six of the other 15 credit courses on offer in the degree programme (or up to 30 credits outside the Department - see the note on electives later). Our third year courses are specialist options based closely on the expertise and research of individual members of staff.

</tr>
</tbody>
</table>

**BA Geography or BSc Geography**: The overall structure of the Single Honours degree programme is the same for BA Geography and BSc Geography. The BA or BSc prefix largely reflects the balance of options taken and the wishes of the individual student. It is possible to change the degree programme during the year if you wish (see section 5.2).

The **BA Human Geography and BSc Physical Geography** programmes provide designated human and physical geography streams through the existing programme structure. Each has a core first year which
is the same as the BA/BSc Geography programme. Thereafter you follow a pathway of either human or physical geography options as described in the tables above. Your options are explained to you at pre-registration by the Undergraduate Education Lead, and your Personal Tutor is always available to give further advice. Students taking the BA/BSc Geography programmes may change to a Human or Physical Geography degree providing they have the right combination of courses (see section 5.2).

- GG3163 The Sea: Place, People, Politics
Module registrations

You can only register for 120 credits’ worth of modules in each academic year (this excludes courses which are being re-sat). You will have the option of changing optional modules up to the end of the second week after the start of teaching (excluding Welcome week). Details of all modules can be found on Moodle and are provided to you at preliminary registration in May.

If you wish to change modules after you have registered for them, you should first discuss the matter with your Personal Tutor. You should then complete a Change of Module form available from the Geography Undergraduate Moodle page. This should be sent to Professor Katie Willis, Undergraduate Education Lead. Because of room capacity issues, some modules may be full so you will be unable to change. First-Year registration is compulsory, therefore, no changes can be made.

Electives

Electives are non-geography modules which may be selected from other College departments, which you may opt to do as part of your own degree course. Any electives have to be approved by both Geography (through your personal tutor) and by the Department in which the course is taken. Taking electives will not alter the title of your degree.

To ensure that all our students have a firm grounding in degree level Geography, we do not allow you to take courses outside the Department in your first-year. Because of the diverse nature of Geography and the importance of developing career-related skills, we are happy to sanction relevant options in the second and third years, subject to the agreement of the host Department. Courses are weighted according to the year in which you take them (e.g. any external courses you take in the second year are given second year weighting, irrespective of what year they are designed for in their host department). However, in order to maintain standards, we do not permit third year students to enrol for first-year courses in other departments. For this reason you should think carefully about your choice of any electives and their place in your final degree profile. In years two and three, you may take up to 30 credits in each year outside the Department.

5.2 Change of course

You may transfer between Geography degree courses provided that you satisfy the requirements of the particular degree. If you want to transfer, please contact Professor Katie Willis, the Undergraduate Education Lead before the end of Term 2. Changing your course in Term 3 can lead to delays in getting your results.

Geography with an International Year/Geography with a Year in Industry

The College offers students the opportunity to study abroad for a year through the International Exchange programme, or to have a year’s placement in business or a volunteering opportunity. Students who are interested in one of these schemes apply in Term 1 of the second year. If they are successful their degree registration will change to reflect the year spent away from campus (between Years 2 and 3 of the degree).

For further details on participating in these programmes contact the Department’s Careers and Employability Officer, Dr Daniele Colombaroli.
6 Facilities

6.1 Facilities and resources within your department

‘Library@Geography’
The Department has its own study space supported by the library: ‘Library@Geography’ (QB174) containing work space and maps. Library@Geography offers a quiet place for students to work – consumption of food, drink and the use of mobile phones is not permitted.

For academic year 2020-21, because of the distancing requirements due to Covid-19, we are having to use this space for small group teaching more than usual. If you are using the space for independent study, then please ensure you follow the distancing guidelines.

6.2 The Library

One of the most important resources for you as a student at Royal Holloway is the Library Service. The Library is housed in the Emily Wilding Davison Building, located on the east side of Founder’s Square. Details, including Library Search, dedicated subject guides and opening times can be found online from the Library home page.

The Ground Floor of the Library contains a High Use Collection which includes many of the books assigned for undergraduate courses. The rest of the Library collections are on the upper floors. There are plenty of study areas and bookable rooms to carry out group work, as well as many areas to work on your own. The Library contains a large number of PCs and has laptops to borrow on the ground floor to use in other study areas.

Books heavily in demand may be on short loan. Please consult the course tutor in good time if there are particular works which you would like to see on short loan.

The library is always happy to consider students’ suggestions for more books. If you think that the Library does not have a book useful for a course you are following, or for a dissertation you are writing, or if you feel more copies of a book are required, please contact the library’s Information Consultant for your subject (and let your course tutor know). Be aware, however, that not all requests can be satisfied and that there is sometimes a delay between ordering and receipt depending on our supplier’s stock.

The Information Consultant for Geography is Debbie Phillips. She can be contacted if you have particular issues around accessing library resources. She also runs sessions for Year 1 and 2 Geography students as part of the GG1011 and GG2001 modules.

Using other Libraries

Senate House Library (University of London), Senate House, Malet Street, London, WC1E 7HU (020 7862 8462) https://www.senatehouselibrary.ac.uk/

As a student of the University of London, you have access to the University of London Library (Senate House Library), which is situated in Central London. This central Library has large reference collections and facilities for borrowing and is an important resource for print and online material for the Arts & Humanities and Social Sciences (with limited Science coverage). In order to obtain a Senate House Library card you must present your College ID card at the Senate House Library and complete a short application form. You also have access to SHL’s online resources and these can be accessed via the Library Subject Guides.

The British Library, 96 Euston Road, London, NW1 2DB (020 7412 7000) http://www.bl.uk.

Please check the BL’s web pages for registration and access regulations, or contact the Royal Holloway Library for advice.

Other libraries

You may also be able to register as a reader at the libraries of other Colleges if you can demonstrate that you need to use their collections. Please check the respective College
Library’s web pages before visiting. More information about using other libraries can be found here.

You are strongly advised to familiarise yourself with the Library and its resources as early as possible in your degree.

6.3 Photocopying and printing

The departmental printers and photocopier are reserved for staff use. Copier-printers (MFDs) for students are located in the Library, the Computer Centre and many PC labs, which will allow you to make copies in either black and white or colour. Further information is available here.

Occasionally, students are expected to produce posters, or other printed material beyond the A4 size typical of open access printers. Such printing can be arranged through the Cartographic Technician, Jen Thornton (QB137), for a charge (charge depends on page size). Department facilities allow for standard printing to A0, or special sizes on request.

6.4 Computing

There are ten open access PC Labs available on campus which you can use, including three in the Computer Centre. For security reasons access to these PC Labs is restricted at night and at weekends by a door entry system operated via your College card. At College registration you will be given details of induction procedures, user accounts and password procedures. This will also include discussion of MS Teams which we will be using for our online teaching. All Geographers are expected to have basic information technology skills by the end of the first term of the first-year (operation of Windows, word-processing, spreadsheet use and basic web skills). We expect you to have at least the basic competence in information technology as provided by some of the IT Training sessions run by the Computer Centre.

How to find an available PC

There are a range of self-study packs designed to enhance your current IT skills, these can be found by visiting the Skills Hub. The Department recommends that you give consideration to courses relating to the use of Microsoft Office. Of particular use are courses relating to Word, Excel spreadsheets and PowerPoint. Other courses are available for later years, including data presentation, managing large documents, referencing and advanced Word for dissertations. Further advice will be given during the Geographical Techniques module.

The Department also has postgraduate computing facilities in the Geospatial and Visual Methods Laboratory (GVML)(QB146) which, in special circumstances may be made available for undergraduate use if either:

a) software is required as part of a taught course; or b) if specialist software is required for project/dissertation work that is not available elsewhere on campus. Ray Aung (QB137) is the Computer Technician responsible for day-to-day running of the Departmental computing facilities.

7 Assessment Information

7.1 Anonymous marking and cover sheets

You’ll find that your work in the Geography Department is assessed in a variety of ways throughout the degree. This reflects the different kinds of knowledge, skills and abilities that you are developing through the degree programme. We are also keen to give students with different strengths a chance to demonstrate their full potential.

Because the degree structure is progressive (that is to say, you are building each year on the knowledge and skills that you acquired in previous years), the weighting of each year is also progressive. The first-year is not weighted as part of your final degree, as it is designed to introduce important skills, and to bring all students to a common standard. The second year will count for one third of your final mark, and the third year for two-thirds. The progressive structure and weighting is standard across the college, and so is the same for all students, irrespective of their degree programme.
In the first-year some of the work that you submit to your tutors is for what we call formative assessment - that’s to say, this work does not count towards your end of year marks, and hence, towards progression into year 2; but is marked intensively to help you improve the ways in which you work. Do not be tempted to regard this work as non-essential - getting the most out of these assessments, and the feedback provided to you, is vital for your development as a geographer. **Non-submission of tutorial work may lead to the issuing of an informal or formal warning.** Later in the degree the balance shifts towards summative assessment - pieces of work which we use to give you grades and contribute towards your final degree classification.

### 7.2 Submission of work

Submission of all coursework (formative and summative) should be through Turnitin, via each module’s Moodle page, unless advised otherwise. Marking, wherever possible, will be done electronically. The nature of some assessments make electronic marking impractical, and so for these pieces of work, a hard copy submission will be made via the School Helpdesk (Wolfson 118). Turnitin submission may still be required for plagiarism detection purposes. Please assume that all work should be submitted for plagiarism checking unless advised otherwise.

### 7.3 Penalties for over-length work

Developing your skills as a Geographer requires communicating in different formats, including assessments of different lengths. In all cases, clear, succinct writing is required.

All pieces of course work have maximum word lengths, and you will be informed of these when assessment information is given to you.

Work which is longer than the stipulated length in the assessment brief will be penalised in line with Section 13, paragraph (5) of the College’s Undergraduate Regulations:

**Section 13 (5)**

*Any work (written, oral presentation, film, performance) which exceeds the upper limit set will be penalised as follows*

(a) for work which exceeds the upper limit by up to and including 10%, the mark will be reduced by ten percent of the mark initially awarded;

(b) for work which exceeds the upper limit by more than 10% and up to and including 20%, the mark will be reduced by twenty percent of the mark initially awarded;

(c) for work which exceeds the upper limit by more than 20%, the mark will be reduced by thirty percent of the mark initially awarded.

The upper limit may be a word limit in the case of written work or a time limit in the case of assessments such as oral work, presentations or films.

In addition to the text, the word count should include quotations and footnotes. Please note that the following are excluded from the word count: cover sheet, candidate number, title, module title, figure/table/plate captions*, tables, figures, bibliography and appendices. In addition, for field reports and dissertations the title page, abstract, acknowledgments, contents page, list of plates, figures and tables are also excluded from the word count.

*Figure/table/plate captions should be of reasonable length and should only provide a title and source. You should avoid explanatory detail in these captions (narrative captions).
7.4 What to do if things go wrong – Extensions to deadlines

Please refer to the Extensions Policy and guidance on the College’s webpage about Applying for an Extension.

**Please note:** Not every assessment is eligible for an extension.

All Geography assessments are eligible for extensions apart from the open book examinations in Term 3.

7.5 Support and exam access arrangements for students requiring support

Some students at the College may have a physical or mental impairment, chronic medical condition or a Specific Learning Difficulty (SpLD) which would count as a disability as defined by the Equality Act (2010). The Disability and Dyslexia Service (DDS) can put in place adjustment, support and access arrangements following an assessment.

All students can contact the DDS directly to set up a meeting and assessment. Alternatively if you are not sure whether that is appropriate for you, you can discuss your concerns with your Personal Tutor or the Wellbeing Lead Dr Mike Dolton.

7.6 Academic misconduct - Plagiarism

The Department takes allegations of academic misconduct very seriously. Academic misconduct comes in a range of forms, (see Attendance and Academic Regulations page of the student intranet). The most common form of academic misconduct is plagiarism. This is rarely done intentionally, but even if it is done by accident it is still an offence.

**Avoiding Plagiarism**

The following guidelines, based on those of the Academic Registrar of the University of London, outline how plagiarism can be avoided:

All work submitted as part of the requirements for any examination of the University of London must be expressed in your own words and incorporate your own ideas and judgments. Plagiarism must be avoided, with particular care being necessary in coursework and essays and reports written in your own time. Direct quotations from the published or unpublished work of others must always be clearly identified as such by being placed inside quotation marks, and a full reference to their source must be provided in the proper form (section references section). Remember that a series of short quotations from several different sources, if not clearly identified as such, constitutes plagiarism just as much as does a single unacknowledged long quotation from a single source. Equally, if you summarise another person’s ideas or judgements, you must refer to that person in your text, and include the work referred to in your bibliography. Failure to observe these rules may result in an allegation of cheating. You should therefore consult your Tutor if you are in any doubt about what is permissible.

Examples of what constitutes plagiarism include:

- **Lengthy word-for-word phrases or sentences taken from a piece of work without placing inside quotation marks and without acknowledgement of the source** (see section 7.7 on Referencing)
- **Summary of text in your own words which follows the structure of the original but fails to acknowledge the source** (section 7.7, Referencing)
- **Use of web sites to obtain material that are not acknowledged** (section 7.7 on Referencing)
- **Downloading of ‘ready-made’ essays from the web. Don’t be fooled by companies who claim to check essays against ‘Turnitin’. To do this they have to check them through the system, thus they become a part of it. When you submit the essay, it will return a high percentage match.**
- **Use of ‘good’ essays which may be circulating within the student body from previous years. Note, these would have already been submitted to ‘Turnitin’, and therefore will come up as a close match when checked. The same applies to essays submitted at other universities**
• collusion in group project work or techniques exercises - this may range from group use of diagrams produced by one student, to the circulation of texts between members of the group which are either (in crude examples) copied verbatim or reworded by individual members of the group
• in statistical or quantitative exercises, one student carrying out the exercise and circulating copies of computer output to others.

**Duplication of Work (Self Plagiarism)**

In addition to the above, submitting the same, or essentially the same, piece of work on more than one occasion, whether for different courses or when repeating a course, is classed as **duplication** or ‘recycling’. This is also regarded as an examination offence, as serious as any other form of plagiarism, and thus governed by the same rules as the above. If you are repeating the whole or part of a year and have any concerns about this, you should speak to Peter French as the Chair of the Department Assessment Board.

There are stringent penalties for cases of plagiarism, set out in the College’s “Regulations Governing Examination and Assessment Offences”, which also contains details of the procedures to be followed should a case of plagiarism be suspected. Where a case is identified, all of your assessed work (including the Dissertation) would be examined for possible plagiarism. Furthermore, if writing a reference, a member of staff is required to inform prospective employers that an examination offence was committed.

Please note that the plagiarism issue should not be a negative one from your point of view - the ability to express your own ideas in your own words, to synthesise and evaluate information from a range of sources, to acknowledge the work of others correctly and put your own work in relation to it, and to cooperate in a group without simply copying each other’s work, are valuable skills for your degree and for the world of work beyond. Employers, for example, value the ability to make constructive contributions to a group project, so it will help to demonstrate that you have done this during your degree programme. Coursework is not just for picking-up marks to get through the course, it is for acquiring marketable skills in researching, summarising and presenting material from a variety of sources.

**Finding out more about plagiarism**

As part of GG1011 Geographical Techniques, you will have a lecture about assessment offences, and particularly how to avoid plagiarism. The module also includes sessions on referencing and academic writing. As part of GG1011 you will have to complete an online quiz on avoiding plagiarism.

We also cover plagiarism in the study skills tutorial sessions early in Term 1. To help you understand the process we use to assess a piece of work for plagiarism, you will also be able to see how one of your formative tutorial essays appears in the Turnitin software.

**7.7 Referencing & Bibliographies (Reference lists)**

A reference is the way in which you tell the reader where you have got the information from which you have used in your work. It also tells the reader that the information you are using was produced by someone else. For this reason, acknowledging all such sources of information is critical, not least because failure to do so can lead to accusations that you are trying to use someone else’s information as your own (Plagiarism, section 7.6).

All assessed coursework, therefore, should be properly referenced and have a full bibliography at the end, including all of the sources you have cited in your work. In some cases, you may not have been able to find the original source. For example, you may have read a paper in which the author cites another, for example a paper by Smith (2009) may include a statement that ‘Hunt (2006) showed that there was a correlation between variable A and B’. If you want to quote Hunt’s results, you should, ideally, go to Hunt’s paper and check that Smith has cited correctly. If this is not possible, you should acknowledge the secondary reference by acknowledging this correlation as ‘Hunt, (2006), quoted in Smith, (2009)’. In formal ‘unseen’ examinations you are expected to provide references in your answers, and show that you know the sources of the facts and arguments that you are presenting, but you are not expected to produce a bibliography.
When you cite (identify) references in the text of your assignment, you should include the author’s surname (or name of editor or organisation responsible), the year of publication (or, in the case of an Internet site, when it was last updated), and actual page numbers if appropriate (such as when citing quotes), and where available. There are two approaches to citing references. The first gives prominence to the information, with all the required referencing details in brackets:

‘It has been suggested that the relative seriousness of the two kinds of errors differs from situation to situation (Black 2009).’

The second approach gives prominence to the author by using the author’s name as part of your sentence, with the date and page number in round brackets:

‘Black (2009) has suggested that the relative seriousness of the two kinds of errors differs from situation to situation.’

Page numbers are necessary when you directly quote a passage, or when you copy tables or figures:

‘A recent study has shown a series of possible causes that “result from changes in environmental factors”’ (Jones and Chan, 2002: p2).’

Having written your assignment and included a range of citations, it is important to list all of these, in alphabetical order, by authors’ surname, in a bibliography at the end of your work. This bibliography is typically titled ‘References’ or ‘Reference List’. This should be comprehensive and detailed enough to allow the reader to trace all items you have used. There are a range of referencing and bibliographic conventions, examples of which may be seen in current academic geography journals. There are also often different conventions adopted for human and physical geography subjects, and you will come across both in your time here. Which you use will depend on the work being assessed, but the most important rule is to be consistent. Particular lecturers or your dissertation advisor may suggest you use certain conventions because of the particular materials you are working with.

The following is suggested as an appropriate standard format, based on the so-called ‘Harvard’ or author-date referencing system. The following guidance is based on the book Cite them right: the essential referencing guide (2010), multiple copies of which can be found in the Bedford Library:-

1) References in the text should give the surname of the author and the year of publication in brackets, for example, Collins (1970) or (Smith and Jones, 2001). When there are two or more references to work by one author for the same year, the year is followed by the letter a, b, c, etc. - e.g. (Harris, 1996c). Text references to multi-authored work should include the first author’s name, followed by ‘et al.’ then the year of publication e.g. Collings et al. (2012). The reference list must contain all of the authors of the paper.

2) Page numbers should be given for quotes, for example, (Collins, 1970 p42).

3) Examples of references for different types of publication are given in Appendix B. Please note that the bibliography should not be divided according to these categories (i.e. with sub-sections for journal articles, books, chapters etc). Many more examples, including guidance on how to cite audio, visual, and digital material, can be found in Cite them right: the essential referencing guide (2010).

A summary of this reference and a guide to correct referencing style, can be found here. Examples of referencing & bibliographies can be found in Appendix B.

7.8 Illustrations

The use of illustrations in your work is important, as these can convey a lot of information and replace text. These should be scanned and cut and pasted into the essay, avoid cutting out photocopies and sticking them onto the relevant page with glue. Colour is fine. It is important, however, to obey a few rules:-
• All illustrations should be numbered consecutively, and referred to in the text. This can be sequentially, e.g. Figure 1, Figure 2, etc; or by sections, Figure 1.1, Figure 1.2, Figure 2.1, etc.
• Refer to graphs and diagrams as ‘Figures’; tables as ‘Tables’, and Photographs as ‘Plates’
• All should have a title and a source (reference from where they are obtained). If you use a web site, such as Google image, then you should acknowledge this.
• Make sure that after scanning, the quality of the image is still readable at the size you reproduce it.

7.9 Grade Descriptors & Marking Criteria

See Appendix A for the assessment criteria that are used by examiners in marking work within the Department, and show the general criteria that are used to calculate grades and marks. They are general models of the characteristics that are expected of work being awarded particular grades.

When looking at these tables you should keep the following points in mind:
• Many pieces of work will have characteristics that fall between two or more classes. Your examiners retain the ultimate decision (academic judgement) as to the mark given to a particular piece of work, and your mark may be amended following consultation with second markers or visiting examiners.
• Look at the full range of assessment criteria, rather than just those that correspond to your own judgement of your abilities. When marking your work, examiners look at a range of different aspects of your work. For example, the form for comments on coursework essays shows the most important aspects of essay writing as a series of tick-boxes. Think about how you could improve each of these aspects of your work.
• These criteria give general models of assessment criteria. Your course leaders will also discuss the specific assessments for their courses, particularly where these are not standard essays.

7.10 Feedback

Feedback is an important part of your learning process as it allows us to communicate with you regarding the quality of work you are producing and to suggest ways in which you can improve your work in future. It should not be regarded purely as a means of communicating your mark. You should be aware that feedback occurs in many different ways throughout the duration of a course, and your time in the Department in general.

The most obvious form of feedback is the returned coursework feedback, which is usually delivered online. This contains important detail of the areas in which your work has succeeded in its aims, and also comments on how you could improve for the next assessment. The feedback will always include a comment sheet, but it may also include comments on the actual text of the assessment, either in the form of comment bubbles, or in text comments.

It is important that you understand this form of feedback and take it on board. If there is any aspect that you don’t understand, then please contact the marker for clarification. Feedback dates are available alongside the assessment deadlines on the student noticeboards and on the Geography Undergraduate Moodle page. You will be sent an email to inform you when the feedback is available online.

The comments on the feedback are based on the marking criteria in Appendix A. Different sets of marking criteria apply to different forms of work, but in general, there are a set of common criteria which the marker is looking for. These are detailed on each of the relevant tables. You are advised to study the marking criteria before completing assignments, in order to understand the differences between the different marks.

Marks below 40% are regarded as fails. The significance of failing a course are detailed in the College regulations.

Marks between 30-39% may allow a candidate to resit the failed elements of that course or be granted a condensed fail (depending on UG regulations).
The return of coursework feedback represents only one form of feedback. There are also other forms of feedback which you should also consider. This may take different forms, and may be ‘informal’ in nature, but is still important to you as a way of finding out how your work can be improved. Such feedback includes:

1) Comments and discussion with staff and demonstrators in lab and field classes.
2) Discussion in first-year tutorial classes.
3) Discussion with course leaders in office hours.
4) Critique of dissertation draft material by your allocated advisor.
5) Discussion in seminars.
6) Start and end of term Tutor meetings.
7) Generic, group feedback to a whole class.
8) Moodle self or group assessment.
9) Start of year meetings dealing with exam feedback.

7.11 The Role of the Geography Exams Team & the Department Assessment Board

This section outlines the principal procedures for collating marks and the processes by which candidates’ final degree classifications are confirmed and our assessment procedures are monitored. Please note that this is a summary, intended for your information and to assure you that we have a rigorous, robust and fair system in place. Not all the details of our procedures are covered.

Exams and Coursework Marks

Below is a summary of key steps taken for compiling marks:

- All assessment marks are derived from single marking with moderation. This means that every piece of assessment is marked by an Internal Examiner (usually the Module Leader), then a sample of work, including scripts from across the full range of marks, including grade boundaries and all Fail marks, is then additionally marked by a second Internal Examiner to confirm standards.
- The independent and placement linked dissertations (GG3001/5) are double marked. This means that two Internal Examiners mark the dissertation and agree a mark.
- All final course outcomes are moderated by VisitingExaminers, (a human and physical geographer from other universities depending on whether it is a human or physical course) with particular reference to borderline outcomes, Fail outcomes and the distribution of marks across the cohort. Exceptionally, VisitingExaminers may be asked to mark a piece of student work where internal examiners are unable to agree.
- The module leader, through the electronic marking process, submits marks to be uploaded to the centralised exam system.
- During the exams period, the Exams team checks that there haven’t been any transcription errors. In addition, there is a check to make sure any mark penalties (e.g. late submission or over length work) are subtracted.

Pre Department Assessment Board Meeting (Extenunating Circumstances)

Prior to the meeting of the Department Assessment Board, extenuating circumstances, submitted in line with the procedures set out in the Instructions to Candidates, and detailed in the College Student Handbook, are considered by the College extenuating circumstances committee.

The key role of this meeting is to assess the extent to which a student’s performance is deemed to have been affected by the extenuating circumstances presented, taking into account their severity, duration and the perceived impact on academic performance. It is for the academic judgment of this committee to determine an appropriate course of action in line with College regulations, as a result of the extenuating circumstances presented, which in many cases will be to take no action. The Committee will make a recommendation to the Department Assessment Board, whilst maintaining anonymity and confidentiality.
Department Assessment Board

Course outcomes are confirmed at the Department Assessment Board meeting, which usually convenes during the last week of summer term. This board comprises the following members: Chair (Exams Officer), all academic staff who have taught and marked courses during the academic year (Internal Examiners), and the two Visiting Examiners. Throughout the meeting students are discussed by candidate number to maintain confidentiality. Recommendations are then passed to the School Progression and Awards Board for ratification and the award of final degree classifications.

In these tasks the role of the Visiting Examiner is fundamental. They provide an independent opinion on our procedures which includes checking that our standards are commensurate with other Geography degrees in the UK; that we are being fair to all students; and that our marking processes are robust and comparable across the range of courses within the department.

8 Health and safety information

The Health and Safety webpage provides general information about our health and safety policies.

The Departmental Health & Safety Co-ordinator oversees health and safety procedures in the Department, in order to ensure that all persons working in the Department do so in a healthy and safe environment. There are rules and regulations that are specific to particular Departmental activities, and every person who is working in or visiting these areas must make sure that they are acquainted with these regulations. Ignoring such provisions means not only putting yourself at risk, but those around you also.

The Department is committed to providing a healthy and safe environment for staff and students to work in. Risk assessment is an ongoing part of Departmental activity, to ensure that all procedures, courses (including the dissertation) and field trips are implemented with the minimum risk to all concerned. Whilst the Department will do all that is reasonably practicable to reduce any risk to health and safety in the Department, it is also the responsibility of individuals to ensure that their working environment, procedures and actions are safe. Safety is everyone’s responsibility.

Health and safety concerns or suggestions should be submitted to the Departmental Health & Safety Coordinator. The Department has facilities located across a number of buildings. Persons with specific responsibilities for each site are:-

<table>

8.1 Code of practice on harassment for students

The College is committed to upholding the dignity of the individual and recognises that harassment can be a source of great stress to an individual. Personal harassment can seriously harm working, learning and social conditions and will be regarded and treated seriously. This could include grounds for disciplinary action, and possibly the termination of registration as a student.

The College’s Code of Practice on personal harassment for students should be read in conjunction with the Student Disciplinary regulations and the Complaints procedure.

8.2 General Safety in the Department

Working hours. Teaching laboratories are open from 0900-1300 and 1400-1650 each weekday. Special arrangements must be made with the Laboratory Manager for access outside these hours. There is no guarantee that work outside normal hours will be permitted. Unsupervised work by undergraduates in the laboratories is not permitted.
Conduct. Always behave in a responsible manner when in the Department. Never run in the corridors or on the stairs, you could cause an injury or spillage. Mobile phones should be switched off in all study areas and should only be used in the foyer.

Belongings. Do not leave your belongings unattended at any time. They should also not be left:

- In corridors or stairwells
- Near exits, particularly fire exits
- Near to emergency equipment, such as fire extinguishers
- Near to electrical equipment or sources of heat

Safety Provisions. Be aware of the fire exit routes, fire extinguishers, fire alarms and first aid kits in the Department.

Medical Conditions. Students will be asked to complete the School Health and Safety Form which includes a medical questionnaire. This information will be shared with field trip leaders so that adequate safety measures can be put in place. Ethical considerations forbid the Health Centre from passing on relevant health information regarding individual students to the Department.

Covid-19. The department is following all College Guidelines with regards to measures to mitigate against the risk of the spread of Covid-19. Hand sanitiser is available in the foyer of Queens Building and should be used on entry to the building. Hand washing facilities are also available in the toilets and in some of the laboratories. It is recommended that all students carry their own hand sanitiser for use in locations where it is not provided.

Face coverings are strongly encouraged in all teaching spaces where 2m distancing cannot be met. Teaching staff may use a face visor instead of a face covering to aid communication. All teaching rooms have been set up to ensure social distancing. All seating is 1m apart, facing towards the lecturer. Disinfectant wipes will be available in all rooms and students will be expected to wipe down their own work areas at the beginning of a session.

Some teaching spaces may have designated exit routes. You should follow any instructions given to you by teaching staff and pay attention to all signage in rooms notifying you of the correct route to take to leave the building.

8.3 Emergencies

First Aid. The main first aid kit is situated in the Departmental Post Room, (QB163). If you suffer an injury, or find someone injured, call a qualified First Aider. Posters displaying the room and extension number of the closest first aiders are located throughout the department. In the event that no staff can be found call Security on x3063.

Fire Alarm. If the fire bell rings continuously:

- Leave the building immediately, by the nearest safe route. Note: This may not be the door you used to enter the building. Do not stop to collect belongings.
- Muster at Assembly Point 15 on the south side of the building straight away; do not wander off without reporting to a Fire Marshall.
- Do not enter the building again until authorised to do so.

Fire alarms are routinely tested. The test days/times are posted in the Department foyer. You should familiarize yourselves of the arrangements for all buildings in which you have classes.

Dealing with fires. If you discover a fire:

- Activate the nearest fire alarm immediately - this is your main priority
- Leave the building by the nearest safe route
- Report to Assembly Point 15, between Queen’s Building and Shilling Building. Let a Fire Marshall
know the location of the fire
• Do not fight fires unless trained to do so - the incorrect choice or use of a fire extinguisher could put your life at risk and/or make the fire worse.

8.4 Code of practice on harassment for students

The College is committed to upholding the dignity of the individual and recognises that harassment can be a source of great stress to an individual. Personal harassment can seriously harm working, learning and social conditions and will be regarded and treated seriously. This could include grounds for disciplinary action, and possibly the termination of registration as a student.

The College’s Code of Practice on personal harassment for students should be read in conjunction with the Student Disciplinary regulations and the Complaints procedure.

8.5 Lone working policy and procedures

The College has a ‘Lone Working Policy and Procedure’ that can be found here.

Lone working is defined as working during either normal working hours at an isolated location within the normal workplace or when working outside of normal hours. The Geography department runs a range of different rooms, from general teaching, reading and computer facilities, to technical laboratories and analysis suites. Access to the Department is available from 0900 to 1700.

The risk associated with using Departmental facilities varies, and thus there are different rules in force for different rooms. These are detailed below:

• Lone working is only permitted in teaching rooms and ‘Library@Geography’ during normal working hours. **Students may not work alone in any Laboratory area at any time.** Use of these facilities for individual project work, such as dissertations, should be arranged with the relevant member of technical staff.
• Inspections/ risk assessments of work areas are carried out by the Departmental Health and Safety Coordinator to ensure that hazards have been identified, risks controlled and provisions for emergencies are in place (e.g. escape routes open, firefighting equipment, first aid).
• In the field, students should work in groups when possible, such as when on fieldtrips. Staff will brief all students undertaking these activities on relevant health and safety issues. For dissertations, we advise you to have a second person with you wherever possible in the field, or if this is not possible, to obey basic rules of leaving contact details and details of return times, etc. Matters regarding health and safety for dissertation fieldwork will be dealt with on an individual basis with your dissertation advisor.

It is likely that most activities will take place on College premises. However, the principles contained in the above section will apply to students undertaking duties off campus.

Any health and safety concerns should be brought to the attention of the Departmental Health and Safety Coordinator or the College Health and Safety Office.

It is likely that most activities will take place on College premises. However, the principles contained in the above section will apply to students undertaking duties off campus.

8.6 Field trips

All students attending field trips should read the ‘Fitness for field studies’ Guide which outlines their responsibilities in relation to their ability to carry out fieldwork. This is available from the Department H&S Co-ordinator but will also be made available on field trip Moodle pages.

Whilst every effort is made to ensure that fieldwork provided by the College is safe, it has, by its nature some inherent risks, for example on coasts, exposed uplands or quarries. Severe weather conditions may be encountered in all seasons, especially near coasts or in upland areas. In accordance with the Health & Safety
at Work Act 1974, course leaders have a responsibility to ensure that correct precautions are taken and have a duty to inform you of all health & safety issues relating to the work they are supervising. In law, YOU have a duty of care to yourself and others whilst engaged in any activity related to your studies at Royal Holloway. It is imperative that students cooperate fully and behave responsibly whilst on any fieldtrip or when doing fieldwork for personal study requirements (e.g. dissertations). Potential dangers make it imperative that students cooperate by behaving responsibly in order to minimise the risk of accidents. Each individual is responsible for their own safety.

A course leader, or dissertation advisor’s, safety instructions will be clear and precise as to the fieldwork involved and should be observed by all members of the group at all times. Anyone not conforming to the standards required may be disciplined and dismissed from the course. Such action could jeopardize continuation on the relevant course(s). If a member of your group should act in an unsafe manner, endangering themselves or others, you have a duty to report this to the field leader – you could save the person, or others, from serious injury. Relevant inoculations, including anti-tetanus, are advised – anyone who does not have the relevant vaccinations attend fieldtrips at their own risk. Safety equipment, such as hard hats and high visibility wear, will be provided by the Department where required.

A medical questionnaire must be completed by all students. This will be requested annually at the beginning of each academic year but you should also update your details if anything changes. Students will also be required to read and sign an appropriate Risk Assessment prior to all fieldwork.

All department-led fieldtrips are covered by College insurance. There may be some exemptions for students with particular health conditions. Students will be informed of this by the Trip Leader and will then need to arrange their own additional insurance. For independent fieldwork the College does NOT include personal accident cover for students. However, basic overseas insurance can be provided by the College for a small charge.

The Following Guidelines Should Be Observed During All Field Trips:

- **Observe all safety instructions** given by party leaders. Anyone not conforming to the standards of behaviour required may be excluded from the field trip. Stay with the party, except by clear arrangements with the leader(s). Assemble where requested in order to receive specific guidance on likely hazards. Observe instructions for reporting after completion of the visit.

- **Report any injury or illness immediately, regardless of how trivial it may appear.** All trips will have trained first aiders on hand.

- **Wear adequate clothing and footwear** for the terrain and weather to be encountered. For rural areas, the following will generally be required:
  - Waterproof jacket and over-trousers.
  - Stout footwear (trainers are not appropriate for most field trips).
  - Warm sweater, hat and gloves for upland or winter trips.

  Leaders may refuse to allow ill-equipped students to participate in field trips.

- **Wear a safety helmet** when advised to do so by the field trip leader. It is obligatory to wear a helmet and high visibility vest when visiting building sites, working quarries and mines.

- **Wear safety goggles** (or impact resistant safety glasses) when hammering rocks or using a hammer and/or chisel.

- **Never use one geological hammer as a chisel to be hit with another hammer,** because dangerous splinters can fly off. Avoid hammering near or towards other persons. Always wear appropriate safety goggles when hammering rocks. Always look the other way when other people hammer near you. Hammer downwards not sideways if other people are around.
Cliffs and quarries require particular care, especially in gusting or strong winds. Ensure that rocks above are secure before venturing below, particularly during a thaw, after heavy rain, or in unstable places such as blasted quarry faces. Avoid unstable overhangs. Avoid loosening rocks on steep slopes, and beware of rock falls. Never work or walk directly above or below another person on a steep slope. Beware of mudflows occurring on clay cliffs and in clay pits.

Avoid touching machinery or equipment on building sites or in quarries or mines.

Do not climb cliffs, rock faces or crags unless approved as an essential part of the work and properly supervised. Take great care when walking or climbing over wet and slippery rocks.

Beware of traffic.

Do not enter old mine workings or cave systems unless authorised as an essential part of your work, then only do so with proper lighting, headgear and route-tracing equipment, in the company of an experienced person. Ensure that someone at the surface knows your location and expected time of return. Be sure to report to them on returning to the surface.

Independent Fieldwork (Dissertation)

All the provisions in the Field Work section also apply to independent fieldwork. The nature of the training, however, involves an important element of self-reliance, and students undertaking independent fieldwork (e.g. as part of their Dissertation) are necessarily responsible for their own safety in the field. The following guidelines must be followed where applicable.

Discuss likely safety problems and risks, and the equipment required, with your supervisor beforehand and complete a Risk Assessment Form. You are not permitted to carry out any independent fieldwork until this is complete. Failure to complete this paperwork can lead to the failure of your dissertation. Plan your work carefully, bearing in mind your experience and training, the nature of the terrain, and the weather. Be careful not to over-estimate what can be achieved in a given time period.

Leave information about your route each day with a colleague or a local person. Never break arrangements to report your return. If camping, it is desirable to do so near habitation.

Check weather forecasts. Keep a constant look-out for weather changes and make contingency plans should a change to the planned timetable become necessary. Do not hesitate to turn back if the weather deteriorates.

Carry relevant equipment with you. These will depend on the type and location of field work being done but consider the following:

- A first aid kit
- Adequate clothing and waterproofs
- Emergency food (chocolate, mint cake, glucose tablets, etc.)
- A survival (bivouac) bag or emergency blanket
- Map, compass and watch
- Torch and whistle

Avoid getting trapped by the tide on intertidal banks or below sea cliffs. Obtain local information about tides and currents. Carefully observe the high-tide mark when working along the shore.

Always wear footwear when wading in rivers, lagoons, or on the shore.

Always obtain permission before entering private property. Follow recognised procedures for visits to building sites, quarries, mines, etc. Be careful to report on leaving the site.

Rock climbing or caving should only be undertaken in the company of an experienced companion AND with prior knowledge of your supervisor.
Working off-shore requires special precautions. Small boats should only be used in the company of an experienced boatman or colleague. Always wear a life jacket. Aqualung equipment should only be used by experienced trained divers. Any activity requiring these activities must be fully discussed with your advisors well before the fieldwork is due to start, as they require additional risk assessment activities at College Level.

Make sure that you are conversant with health and safety requirements in environments with which you are unfamiliar, such as underground, or abroad in tropical, desert or arctic conditions.

Know the International Distress Signal; six whistle blasts, shouts, or flashes of a torch; pause for one minute; repeat six whistle blasts, shouts or torch flashes. Continue until answered by three whistle blasts, shouts or flashes, followed by three more after an interval of one minutes; the answering signal is repeated several times. When in distress, do not exhaust yourself by shouting or blowing a whistle for too long a period - take a break and then start again.

When working on mountains or other exposed areas, familiarise yourself with the mountain safety code. Be aware of the effects of exposure and hypothermia. Know, in advance, what to do in the case of an emergency. The safety code can be found on many web sites, the following link being typical.

Do not carry out fieldwork in countries or regions if the British Government, or other bodies, have advised against travel to, holiday or work in, that country or region. Information can be obtained from the Foreign Office web site.

8.7 Placements

The department offers students the chance to work with a placement organisation as part of the Dissertation stream if they so choose. This specialist stream (GG3005 Independent placement linked dissertation) involves students carrying out their dissertation in collaboration with a partner organisation, under the supervision of an academic member of staff. Students opting for this course will be allocated an advisor who organised the placement, and with whom they will then meet to develop their proposals with respect to research aims, methods, progress, risk assessment and presentation. The placements will take place in the summer break between a student’s second and third year, in line with the Memorandum of Understanding agreed between the placement organisation, the student, and the academic staff advisor.

More details on this course will be provided by Daniele Colombaroli in the first term of the second year, when you will be first introduced to the dissertation process.

8.8 Laboratory Practicals

There are six laboratory suites in the Geography Department, not all of them are located in the Queen’s Building: Munro Fox, Geochronology, Microscope, Computer, Paleoecology, and Sediment Analysis. Users of all laboratories must read the Health and Safety information pertaining to that particular laboratory. You will also be given a laboratory induction prior to any independent research work (dissertations). You should not commence work until you have signed the necessary paperwork with the supervising technician.

A laboratory is a potentially dangerous area as it contains many risk materials, e.g. acids, alkalis, gases, inflammables, electrical and many other hazards. Great care must be taken by all who use these facilities and the rules must be complied with: Anyone failing to comply with the rules will be asked to leave the laboratory to prevent them causing harm to themselves and others.

- Always wash your hands before leaving the laboratory, for any reason.
- Never try to repair broken equipment yourself - ask a member of staff. If you attempt to carry out a repair you could do more damage and/or hurt yourself.
- Do not sit on laboratory benches - you never know what you may be sitting on.
- Make sure to clean and tidy your work area before leaving the laboratory.
- Put all rubbish in the bins, as labelled.
- Food and drink must not be consumed in, or even brought into, any laboratory.
For those involved in laboratory work, there are Safety Notes and procedures specific to each laboratory; these must be read and understood during the laboratory induction which will take place with the supervising technician before commencement of work. The same applies to the COSHH Regulations, which must be read, and a declaration form signed prior to commencement of work. This includes lab work as part of undergraduate courses. Your course leader will organise this for you.

**General Laboratory Guidelines**

**Supervision.** A student may use laboratory facilities in the Department ONLY under the direct supervision of one of the members of staff, who should be present in person. Any lone working must be approved by the Lab Manager.

**Independent Project Work** must be approved beforehand by the member of academic staff responsible for the appropriate course.

**Accidents.** Relevant emergency action is displayed in each laboratory. Before starting work, you should make sure you know the precise location of:

- Fire extinguishers and blankets
- First aid kit
- Spill kit

**Chemical laboratories:**

**Protective clothing.** Laboratory coats must be worn at all times. Safety glasses and gloves must be worn when indicated, and long hair tied back. These will be supplied by the Department. Open toed shoes and shorts are not permitted in labs.

**Concentrated acids.** The student MUST wear eye protection and disposable gloves. Never add water to concentrated acid; always dilute concentrated acid by adding acid to water, slowly, with the receptacle in a sink.

**Hydrofluoric (HF) and Perchloric (HClO4) acids** must not be used by students at any time. All operations involving these acids will be carried out by a supervising staff member.

**CoSHH Forms** must be read and signed before using any chemical.

**Lone working** is not permitted for undergraduate students. Postgraduate students must be trained and show that they are competent before being allowed to work alone and without supervision.

**Other hazards.** Many other dangerous chemicals are used in chemical laboratories. Laboratory apparatus can also be dangerous if used improperly. Do not tamper with anything unless specifically authorised, and instructed in operating procedures.

**Overnight use.** Some types of equipment are designed to run unattended overnight. Such use must be authorised by a staff member beforehand, and appropriately labelled with name and contact number.

**Breakages and spills.** Major spills should be reported immediately to supervising staff. Switch off all electrical equipment - at the equipment first - in the affected area. Do not attempt to switch off at the mains if overheating or smoking is taking place. If acids or solvents are involved, evacuate the laboratory. Please report all breakages and defective or leaking containers to supervising staff immediately.

**Samples.** All samples should be labelled with your name, your supervisors/advisor’s name, site location and what they are. Similarly, any chemical solutions made up as part of a set of analyses should be labelled with what they are, their concentration, and date of mixing. Any unlabelled samples or
solutions are a hazard as it will not be clear to anybody else what these are.

Non-Chemical Laboratories:

These laboratories contain very expensive equipment. While the general rules apply, do not move the equipment for any reason whatsoever. If this needs to be done, ask a member of staff. Do not attempt to repair, modify, or carry out maintenance on any piece of equipment.

Make sure that any equipment that you have used is switched off (using the correct shutting-down procedure) before leaving the laboratory (unless it is marked that it should be left on). Always switch equipment off at the machine first, then the electrical supply.

Radiation Laboratories:

Students needing to use the Geochronology Laboratory must receive training and authorisation from the supervising staff member for that Laboratory (Professor Simon Armitage), and must register with the College for work with ionising radiation.

<tr>
<th>Grade</th>
<th>Class</th>
<th>Marking criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st</td>
<td>Deep understanding; near-comprehensive knowledge; significant originality in interpretation or analysis; coherent structure (may show significant innovation in its organisational form); intensive, detailed and critical use of literature with independent reading beyond reading lists; deep awareness of key debates in the literature; Approaching professional standards of presentation</td>
<td>High 1st 100</td>
</tr>
<tr>
<td></td>
<td>Deep understanding; detailed knowledge; coherent structure (may show some innovation in organisational form); in-depth reading (with either independent reading beyond reading lists or intensive, detailed and critical reading of suggested material); Clear awareness of most key debates in the literature; excellently presented; referencing and bibliography of near-exemplary standard; incisive and fluent style, excellent spelling and grammar; high levels of ability in the analysis of quantitative or qualitative information (where appropriate).</td>
<td>Mid 1st 88</td>
</tr>
<tr>
<td></td>
<td>Sufficient evidence for deep understanding; Clear awareness of some key debates in the literature; detailed knowledge; may show some originality in interpretation or analysis; in-depth reading (with either independent reading beyond reading lists or intensive, detailed and critical reading of suggested material); incisive and fluent style, Most figures/tables (if presented) strengthen the arguments made in the essay. Comprehensive bibliography and good referencing;</td>
<td>Low 1st 78</td>
</tr>
<tr>
<td>2:1</td>
<td>Clear understanding; wide-ranging knowledge; direct focus on question; evidence of critical thought in the analysis of literature; in-depth reading; clear awareness of some key debates in the literature; detailed referencing; properly formatted bibliography; coherent structure; well-presented; figures/tables (if presented) are relevant to the topic and may strengthen the arguments made in the essay; fluent style; good spelling and grammar; generally effective analysis of quantitative or qualitative information (where appropriate).</td>
<td>High 2.1 68</td>
</tr>
<tr>
<td></td>
<td>Demonstrates a general understanding and knowledge, with a focus on the question, but is mainly descriptive with insufficient critical insight or depth for a 2:1, likely to draw heavily on lectures or other direct teaching; may be some further reading and referencing but its use is descriptive rather than critical and likely to be focused on case study descriptions with limited awareness of wider debates; adequate structure and presentation; If figures/tables are presented they may not be the most relevant short bibliography for the level; straightforward style; some errors in spelling and grammar; familiarity with correct strategies for analysis of quantitative or qualitative information, but possibly with errors in the process of analysis (where appropriate).</td>
<td>Mid 2.1 65</td>
</tr>
<tr>
<td></td>
<td>May be weaknesses but sufficient evidence in criteria 1-4 for a 2:2</td>
<td>Low 2.1 62</td>
</tr>
<tr>
<td>2:2</td>

</table>
### Marking criteria for Coursework Essays

1. Focus on the question/assignment
2. Level of critical understanding
3. Extent to which arguments are supported by further reading
4. Evidence of independent thought in argument or analysis
5. Appropriate bibliography and referencing style
6. Effective communication
7. Presentation of work

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>High 3rd</td>
<td>Likely to be a lack of focus on the question (criteria 1) with insufficient evidence in criteria 2-4 to merit a 2:2.</td>
<td>48</td>
</tr>
<tr>
<td>Mid 3rd</td>
<td>Weak performance in some criteria, in particular 1-4</td>
<td>45</td>
</tr>
<tr>
<td>Low 3rd</td>
<td>Likely to be weak in all criteria but there is sufficient material for the work to merit a pass.</td>
<td>42</td>
</tr>
</tbody>
</table>

**Condonable Fail**

- Criteria 1-4 not addressed to a satisfactory level. Some elements of criteria 5-7 may be ok.

**Non-Condonable fail**

- Poor performance in most criteria.

- V poor performance in most criteria. May have inadequate structure; or work is too short

- Work is unacceptable for the level. May be some vague knowledge of subject but likely to be irrelevant or confused. The examiner will have to search for material that is relevant to the question. Work may be unacceptably short. Usually poorly written and badly presented.
