

Community Action Project
Generating Genius
Community Action Partner
Generating Genius

Aim:

Generating Genius works, alongside a wide range of partner schools and universities, with hundreds of high-achieving children and young people from challenging backgrounds where there has been no tradition of entry to higher education. Through our two personalised support programmes, we aim to enable at least 90 per cent of participants to win places at elite Russell Group universities. Generating Genius has a huge emphasis on study in STEM subjects.

Roles:

Our Uni Genius programme would like to hear from current university students, post graduates and professionals with a university degree in a range of subjects, who have what it takes to become an Academic Mentor. Volunteers are required to aid Uni Genius student's academic progress, by providing tailored support over the course of the school year, at regular sessions to be held at UCL.

Training:

Full training will be provided and you will receive ongoing support through Generating Genius.

Times: One evening a week, either a Wednesday or Thursday.

DBS: A DBS is required for this project

All project volunteers must be registered as Community Action Volunteers.
